Mai-Wel E-Cycling Services

The Mai-Wel Group's newest project, a locally based e-cycling service, offers local business and industry the opportunity to discard small or large quantities of unwanted electrical equipment such as computers, printers and televisions in an environmentally friendly and economical way.

This is an innovative way to deliver environmentally sustainable practices as we are able to recover finite resources such as precious metals, diverting them from landfill, to be reused in new electrical items and other products.

- 🔌 For a small fee, our team will collect your unwanted electrical items from your business at a time that is convenient for you.
- 🔌 99% of items can be recycled and some items are able to be refurbished for resale to local charities.

- 🔌 We can supply a 'certificate of destruction' so you have peace of mind knowing your unwanted hard drive's have been destroyed confidentially.
- 🔌 We offer a simple and easy service for a fixed price.
- 🔌 The added bonus... you are contributing to valuable, long term employment opportunities for people with a disability in the Hunter region.
